

# REQUEST FOR PROPOSAL (RFP)

## Comprehensive B2B University Aggregator & Centralized Admission Management System

|                   |                                                                                  |
|-------------------|----------------------------------------------------------------------------------|
| Organization      | RIMIT Education & SPES Education (Managed by RIMIT Educational Charitable Trust) |
| Point of Contact  | Abdul Bari Chengana, Managing Director                                           |
| Primary Locations | Kerala, India (Core hubs in Kochi & Malappuram)                                  |
| Date of Issuance  | July 1, 2026                                                                     |

### 1. Executive Summary

RIMIT Education, operating in conjunction with SPES Education under the RIMIT Educational Charitable Trust, is inviting proposals from established software development agencies to build a robust, scalable, cloud-based Business-to-Business (B2B) Educational Portal and Centralized Admission Management System.

The objective of this project is twofold. First, it will serve as a national **University Aggregator**, bringing diverse universities across India under a single digital umbrella where information regarding courses, dynamic fee structures, eligibility criteria, and digital prospectuses is systematically structured. Second, it will function as an operational **B2B Portal** empowering our vast network of sub-centers and partner institutions nationwide to directly register students, manage demographic and academic profiles, and securely upload required admission documents.

### 2. Company Background & Operational Context

RIMIT Education is a premier educational consultancy and distance education administration organization based in Kerala. Our critical roles include acting as the National Coordinator for Kerala for Mangalayatan University (Online/ODL streams) and serving as the Regional Center Coordinator in Kerala for the Board of Open Schooling and Skill Education (BOSSE).

### 3. Comprehensive Project Scope & Functional Modules

The selected vendor will deliver an end-to-end cloud platform encompassing the following core architectural modules:

#### Module 1: Centralized University Aggregator Hub

- **Unified University Directory:** Visual grid interface for all partner universities (OL/ODL streams) across India, managed dynamically via a central administrative panel.

- **Course & Fee Repository:** Exhaustive listing of courses searchable by stream, eligibility, duration, and structured fees.
- **Prospectus & Document Library:** A centralized digital vault allowing instant access, viewing, and downloading of university prospectuses, academic calendars, and official notifications.

## Module 2: B2B Sub-Center Partner Panel & Architecture

**Critical Operational Requirement:** The sub-center dashboard must be highly comprehensive, offering dedicated sidebar navigation for Leads, Accounts, Marketing, and Support. It must replicate an enterprise-grade ERP experience for our franchise partners.

The vendor must develop the following specific menu structure and functionalities for the Sub-Center Panel:

### 1. Main Dashboard

- Active vs. Total Sub-center statistics.
- **Escalation Matrix:** Multi-level support contacts (Level 1, Level 2, Level 3) with names, mobile numbers, and emails for sub-center issue resolution.
- **University SPOCs:** A structured list showing the Single Point of Contact (SPOC) mapping for each respective university.

### 2. Students & Leads Management

- **Universal Lead Generator:** Form interface capturing Lead Owner, Full Name, Email, Mobile, Course, Sub-Course, Date of Birth, State, and District.
- View Options: *Show Leads*, *Show All*, and *Students* (Confirmed Admissions).

### 3. Accounts & Financials

- **Bills & Ledgers:** Transparent tracking of center-wise ledger balances.
- **Payments & Invoices:** Payment gateway logs and automated invoice generation.
- **Download Center:** Bulk download facility for financial receipts and admission confirmations.

### 4. Marketing Tools Suite

- **Landing Pages:** Access to pre-approved, university-specific lead capture pages.
- **WhatsApp Integration:** Direct API trigger capabilities for student communication.
- **Psychometric Test:** Access to career counseling tools for prospective leads.
- **Knowledge Base & Media Assets:** Repository for promotional banners, social media assets, and training documents.
- **Brochures & Benchmarking:** Downloadable marketing collateral.

### 5. Helpdesk & Support

- **Tickets System:** Internal ticketing system for sub-centers to raise technical, operational, or admission-related queries directly to RIMIT central administration.

### Module 3: Advanced Business Logic & Intake Controls

- **Session Enforcement Matrix:** Programmatic validation rules mapping specific student eligibility to distinct intake cycles (e.g., blocking fresh candidates for July sessions, enforcing October sessions).
- **Multi-tier Access Hierarchy:** Granular access configuration mapping directly to specific organizational roles (Super Admin, Academic Head, Counselors, Finance, and Sub-Centers).

## 4. Technical Requirements & Architecture Standards

| Category                 | Technical Specification Requirement                                                                                                               |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Deployment Model         | Cloud-native web application, mobile-responsive design optimizing layouts across Desktop, Tablet, and Mobile devices.                             |
| UI/UX Design Standard    | Modern left-sidebar navigation architecture (Dashboard, Leads, Accounts, Marketing Tools, Tickets) with a clean, grid-based central content area. |
| Storage & Document Vault | Secure cloud storage optimized for high-volume PDF prospectus downloads and student document uploads (Identity Proofs, Marklists).                |
| Security Protocols       | Multi-Factor Authentication (MFA / OTP via SMS/WhatsApp) for B2B sub-center logins, SSL/TLS data encryption in transit.                           |

## 5. Evaluation Criteria & Vendor Submission

Responding agencies must structure their PDF submissions cleanly, providing detailed insight into the following items: Corporate Overview, Technical Blueprint, Relevant Case Studies, and Itemized Commercial Breakdown.

| Evaluation Dimension                                              | Assigned Weight |
|-------------------------------------------------------------------|-----------------|
| Sub-Center Dashboard Features & UI Execution Strategy             | 30%             |
| Technical Approach & Database Design for Aggregator Platform      | 25%             |
| Commercial Proposal, Cost Competitiveness & Scalability Value     | 20%             |
| Proven Experience & Quality of Portfolio Case Studies             | 15%             |
| Post-launch Service Level Agreement (SLA) & Training Capabilities | 10%             |

## 6. Submission Guidelines

- **Document Format:** Proposals must be submitted strictly in electronic PDF format.
- **Delivery Address:** Submissions should be securely transmitted via email with the explicit subject line: "**RIMIT Education - Enterprise B2B Aggregator System Proposal - [Vendor Name]**".
